

CENTERS FOR DISEASE CONTROL AND PREVENTION (C)

The Centers for Disease Control and Prevention (CDC) serves as the national focus for developing and applying disease prevention and control, environmental health, and health promotion and health education activities designed to improve the health of the people of the United States.

To accomplish its mission, CDC identifies and defines preventable health problems and maintains active surveillance of diseases through epidemiologic and laboratory investigations and data collection, analysis, and distribution; serves as the PHS lead agency in developing and implementing operational programs relating to environmental health problems, and conducts operational research aimed at developing and testing effective disease prevention, control, and health promotion programs; administers a national program to develop recommended occupational safety and health standards and to conduct research, training, and technical assistance to assure safe and healthful working conditions for every working person; develops and implements a program to sustain a strong national workforce in disease prevention and control; and conducts a national program for improving the performance of clinical laboratories.

CDC is responsible for controlling the introduction and spread of infectious diseases, and provides consultation and assistance to other nations and international agencies to assist in improving their disease prevention and control, environmental health, and health promotion activities. CDC administers the Preventive Health and Health Services Block Grant and specific preventive health categorical grant programs while providing program expertise and assistance in responding to Federal, State, local, and private organizations on matters related to disease prevention and control activities.

Immediate Office of the Director (CA)
