A GUIDE FOR HEALTHCARE PROVIDERS

ABOUT INCORPORATING
ALCOHOL SBI INTO YOUR
HEALTHCARE PRACTICE

ALCOHOL SCREENING AND BRIEF INTERVENTION (SBI) is recommended by the U.S. Preventive Services Task Force (USPSTF) and endorsed by major medical professional organizations, such as the American College of Obstetricians and Gynecologists, American Academy of Family Physicians, American Medical Association, and American Academy of Pediatrics, as well as CDC.

CDC has engaged healthcare providers (HCPs) to identify the most common challenges they face in consistently and completely conducting alcohol SBI, and to learn what supports they would like. Many tools and resources are available to help HCPs overcome barriers to conducting alcohol SBI with all adult patients.

ALCOHOL SBI CAN HELP YOU IDENTIFY THE

1/3 OF U.S. ADULTS

WHO DO NOT HAVE ALCOHOL USE DISORDER, BUT WHO

DRINK IN WAYS THAT PUT THEMSELVES AND OTHERS AT RISK OF HARM.¹

THE GOAL OF SBI IS TO MOTIVATE THEM TO CUT BACK OR STOP DRINKING TO REDUCE RISK OF ADVERSE HEALTH OUTCOMES.

ONE OF THE MOST COMMON CHALLENGES WITH ALCOHOL SBI SERVICES IS FAILING TO DELIVER A BRIEF INTERVENTION TO PATIENTS WHO SCREEN POSITIVE.

ALCOHOL SBI IS RELATIVELY SIMPLE TO DO, AND PRIMARY CARE PROVIDERS ARE UNIQUELY POSITIONED TO EFFECT SIGNIFICANT CHANGE.

TO REDUCE THE RISK OF ALCOHOL-RELATED HARMS,
