

2011

Behavioral Risk Factor Surveillance System

Asthma Call-Back Survey

Summary Data Quality Report

**National
Asthma
Control
Program**

Version 1.0.0
8/15/2013

ACKNOWLEDGEMENT

The Asthma call-back Survey (ACBS) is funded by the National Asthma Control Program (NACP) in the Air Pollution and Respiratory Health Branch of the National Center for Environmental Health (NCEH). The ACBS is jointly administered with the Office of Surveillance, Epidemiology and Laboratory Services (OSELS), Division of Behavioral Surveillance (DBS).

NCEH and OSELS greatly appreciate the efforts of the BRFSS staff in each ACBS participating state.

2011 Asthma Call-Back Survey (ACBS) Summary Data Quality Report

Introduction

Procedures for interview disposition and response rates for the BRFSS Asthma Call-Back Survey (ACBS) follow usual BRFSS procedures; however, some additions and adaptations are required for the call-back survey. Disposition codes, disposition code categories, and response rates are discussed in the sections below. Figure one is a flow chart describing the eligibility paths BRFSS respondents with asthma follow through the ACBS process.

Because asthma characteristics vary by season, a seasonal analysis must take into account any state for which interviewing was not conducted throughout the year. States may have interrupted interviewing due to contract interruptions with their data collection company. In addition, some ACBS interviews are finalized in the first few months of the next calendar year.

Appendix A includes tables showing disposition code categories, response rates and interviews by month for each state participating in the ACBS each year. Appendix B includes formulae for the BRFSS response rates for comparison with formulae for the ACBS rates. More detail on BRFSS response rates and procedures can be found in the BRFSS Data Quality Report Handbook and the BRFSS Summary Data Quality Report for each survey year. Appendix C includes additional instruction on assigning the ACBS specific disposition codes.

Disposition Codes

The usual BRFSS disposition codes are used for the ACBS. However, a few additional codes are needed to account for situations specific to a call-back survey. In the list below, disposition codes added for the ACBS are underlined and bolded. Detailed descriptions of the ACBS codes can be found in Appendix C.

The ACBS disposition codes are:

I. **Eligible, contacted: complete interview**

110 Complete
120 Partial complete

II. **Eligible, contacted: refusal or termination**

413 Refused to participate in the call-back during the BRFSS interview
210 Terminated within the questionnaire during the ACBS interview

- 211** Refused to allow combining ACBS responses with BRFSS responses
- 212** Refused to answer the “ever had asthma” question during the ACBS interview
- 220** Refused to begin the ACBS interview after contacted

III. Eligible, lost to follow-up because unable to contact or communicate with the BRFSS respondent

- 230 Selected respondent never reached or reached but did not begin interview during interviewing period
- 240 Selected respondent away from residence during the entire interviewing period
- 250 Language problem after respondent selection
- 260 Selected respondent physically or mentally unable to complete an interview during the entire interviewing period
- 270 Hang up or termination before respondent selection
- 280 Household contact after number of adults recorded but before respondent selection

- 305 Household members away from residence during entire interviewing period
- 306** Selected ACBS respondent no longer living in the BRFSS household
- 310 Hang-up or termination, known household
- 315 Household contact, eligibility undetermined
- 320 Language problem
- 325 Physical or mental impairment
- 330 Hang-up or termination, unknown if private residence
- 332 Contact, unknown if private residence
- 335 Telephone answering device, message confirming private residential status
- 345 Telephone answering device, unknown if private residence
- 360 No answer
- 365 Busy

- 505 Refusal: hang-up or termination
- 510 Appointment
- 515 Language problem
- 520 Physical or mental impairment
- 525 Answering machine, message confirming residential status
- 535 Answering machine, unknown if private residence
- 550 No answer
- 555 Busy

IV. Eligible, lost to follow-up for technical reasons

- 340 Telecommunication technological barrier, message confirming private residential status
- 350 Telecommunication technological barrier, unknown if private residence
- 355 Telephone number no longer in service or changed
- 370 On never call list

- 420 Not a private residence
- 430 Dedicated fax/data/modem line with no human contact
- 435 Cellular telephone
- 440 Fast busy
- 450 Non-working/disconnected number

- 530 Technological barrier other than answering machine, message confirming residential status
- 540 Technological barrier other than answering machine, unknown if private residence
- 545 Phone number temporarily out of service
- 575 Circuit busy

560	Fax/data/modem
565	Fast busy
570	Possible non-working number
580	Null attempt
585	Requires supervisor attention
599	Missing disposition code

V. Ineligible

<u>291</u>	No parent or legal guardian in the household (child ineligible)
405	Out-of-state
<u>410</u>	Household, no eligible respondent (respondent does not have asthma)
<u>411</u>	Selected respondent not eligible for follow-up
<u>412</u>	Transferred from BRFSS but not attempted (excluded by state)
<u>470</u>	Misdiagnosed asthma in respondent (2008 and later)
<u>480</u>	Not recruited for call-back at BRFSS interview (excluded by state)
<u>490</u>	Random child/adult selection: adult ineligible, child selected
<u>491</u>	Random child/adult selection: child ineligible, adult selected

Definitions and Labels for Disposition Code Categories

Because the ACBS is a call-back interview, all those identified with asthma at the BRFSS interview are, with a few notable exceptions, eligible for the call-back survey. The ACBS eligibility flow chart (Figure 1) summarizes how BRFSS respondents are categorized for ACBS response rate calculation.

ACBS interviews are considered complete (COIN) if the respondents finish the entire interview or if they complete through section 8 of the ACBS interview. ACBS interviews are refusals if the respondent refuses participation at either the BRFSS interview or at the time of the ACBS interview. Terminations are interviews that start but are terminated during the interview.

The disposition codes that relate to contact problems or technology issues are considered “eligible, but lost to follow-up.” If they had been contacted, a small proportion of those eligible but lost to follow-up might actually be ineligible. All temporary disposition codes (numbered 500 or higher) that should have been resolved but were not are treated as comparable 400 level codes.

BRFSS respondents with asthma who are considered ineligible for the ACBS include those who are not asked to participate at the time of the BRFSS interview. Each year between 6% and 10% of those technically eligible are not asked to participate in the call-back survey. Respondents might not be asked for several reasons:

- States with split samples may only include respondents in the call-back if they are in specified splits of the BRFSS sample. Counts for states that exclude split-sample respondents are excluded from the following tables and rate calculations.
- The BRFSS respondent may partially complete the BRFSS interview but terminate before the call-back request.
- Specific state BRFSS call-back contracts may limit the number of call-back interviews due to budgetary constraints.
- States may stop conducting call-back interviews during contract negotiations.

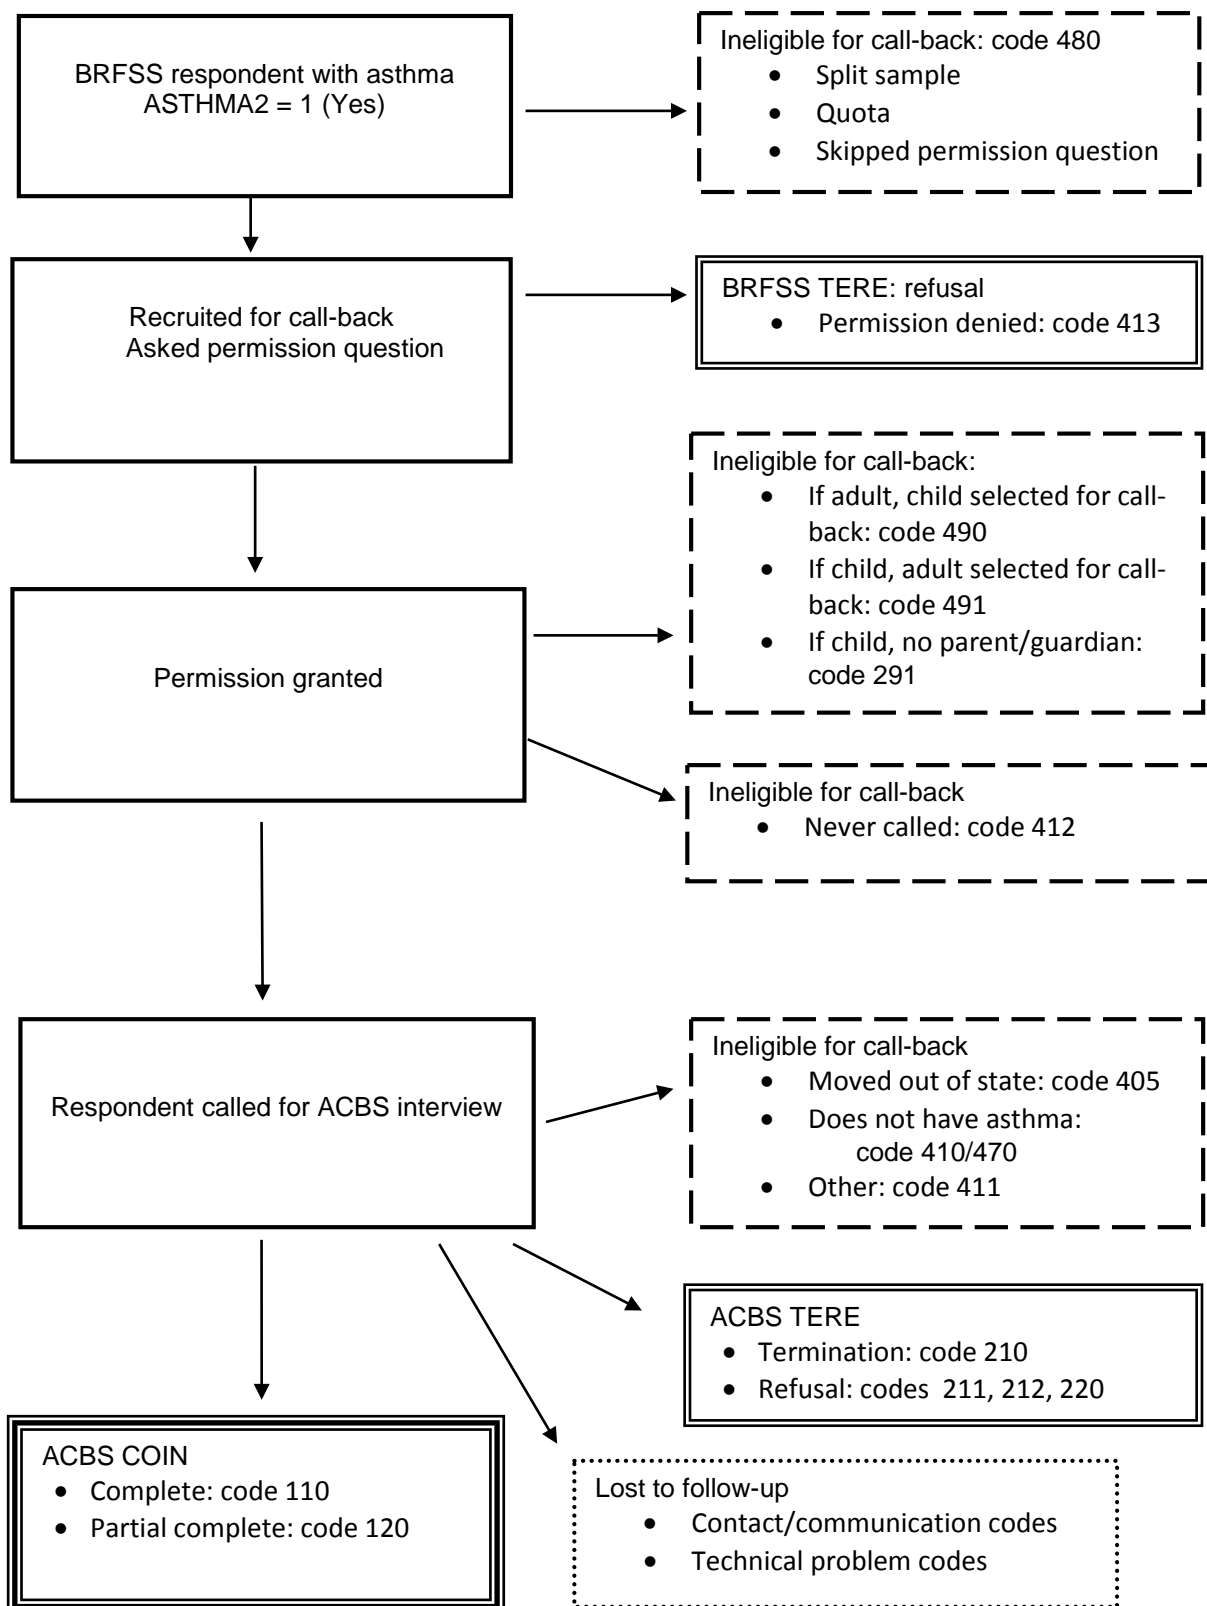

BRFSS respondents with asthma who are asked to participate in the ACBS but are later classified as ineligible include:

- Respondents in households where both the selected adult and selected child in the household have asthma. When both have asthma, only one is eligible for the ACBS.
- Respondents who move out-of-state between the BRFSS interview and the ACBS interview
- Respondents who indicate, at the time of the ACBS interview, that the reported diagnosis of asthma was an error
- Child respondents for whom the adult BRFSS respondent is not the child's parent or guardian
- Some respondents in states that have reached a pre-specified quota for ACBS interviews

The following table indicates how disposition codes are grouped into response rate categories shown in the eligibility flow chart (Figure 1):

Category	Disposition Codes	Notes
Eligible COIN Completed interview	110, 120	Through section 8
Eligible TERE Terminations and refusals	<u>413</u>	At BRFSS interview
Eligible TERE Terminations and refusals	210, <u>211</u> , <u>212</u> , 220	At ACBS
Eligible, lost to follow-up Not interviewed	230, 240, 250, 260, 270, 280, 305, <u>306</u> , 310, 315, 320, 325, 330, 332, 335, 345, 360, 365, 505, 510, 515, 520, 525, 535, 550, 555	Unable to contact or communicate with eligible respondent
Eligible, lost to follow-up Not interviewed	340, 350, 355, 370, 420, 430, 435, 440, 450, 530, 540, 545, 560, 565, 570, 575, 580, 585, 599	Technical problems
Ineligible	<u>291</u> , <u>480</u> , <u>490</u> , <u>491</u>	At BRFSS interview
Ineligible	405, <u>410</u> , <u>411</u> , <u>470</u>	At ACBS
Ineligible	<u>412</u>	No ACBS attempt

Figure 1: ACBS Eligibility Flow Chart:

ACBS Response Rates

The ACBS Interview Completion Rate is the proportion of completed interviews among eligible respondents who are actually contacted for and started the ACBS interview. Those who refuse at the initial BRFSS interview (413), those ineligible, and those never contacted are excluded from the denominator. This rate is based on actual contacts with the eligible respondent at the time of the call-back interview. The numerator of the rate includes completed interviews (COIN). The denominator of the rate includes completed interviews (COIN) plus the number contacted later for the ACBS interview who refuse or terminate the interview (disposition codes 210, 211, 212, and 220).

The ACBS Cooperation Rate is the proportion of completed interviews among all eligible respondents who are recruited and actually contacted for the ACBS interview. Eligible respondents who refuse the call-back at the time of the BRFSS interview are included. Non-contacts are excluded from the denominator, but contacts with communication problems specific to the respondent with asthma are included. The numerator of the rate includes completed interviews (COIN). The denominator of the rate includes completed interviews (COIN) plus refusals and terminations (TERE) plus the number of non-interviews that involved language problems with the respondent with asthma (250) or physical/mental impairment of the respondent with asthma (260). A Cooperation Rate below 65 percent may indicate some problem with interviewing techniques

The Refusal Rate is the percentage of all eligible respondents that refuse to be interviewed or terminate an interview early in the questionnaire. The numerator includes terminations and refusals (TERE). The denominator is the same as for the CASRO rate (below). The denominator includes completed interviews (COIN), terminations and refusals (TERE), and a proportion of those eligible but lost to follow-up. The proportion represents an estimate of the number of those lost to follow-up who would be expected to remain eligible if they had been contacted. The proportion of cases lost to follow-up that are estimated to be eligible is the same as the proportion of cases not lost to follow-up that are eligible. A Refusal Rate above 35 percent indicates some problem with interviewing techniques.

The Council of American Survey Research Organizations (CASRO) rate is a measure of respondent cooperation and is generally defined as the proportion of all eligible respondents in the sample for whom an interview has been completed. The numerator of the CASRO rate includes completed interviews (COIN). The denominator includes completed interviews (COIN), terminations and refusals (TERE), and a proportion of those eligible, but lost to follow-up. The proportion represents an estimate of the number of those lost to follow-up who would be expected to remain eligible if they had been contacted. The proportion of cases lost to follow-up that are estimated to be eligible is the same as the proportion of cases not lost to follow-up that are eligible. A CASRO rate below 40% should be cause for a review of data collection practices that could impact it, especially sample management and interviewer recruitment, retention, training, supervision, and monitoring.

Response rate formulae for the ACBS are specified below. Response rate tables for the ACBS, including response rates for each state participating in the ACBS, can be found in Appendix A. Response rate formulae for the BRFSS can be found in Appendix B

Response Rate Formulae for the ACBS

ACBS Interview Completion Rate:

$$\frac{110 + 120}{110 + 120 + 210 + \underline{211} + \underline{212} + 220}$$

ACBS Cooperation Rate:

$$\frac{110 + 120}{110 + 120 + 210 + \underline{211} + \underline{212} + 220 + \underline{413} + 250 + 260}$$

ACBS CASRO Rate:

$$\frac{110 + 120}{[110 + 120 + 210 + \underline{211} + \underline{212} + 220 + \underline{413}] + P * [\text{Eligible lost}]}$$

ACBS Refusal Rate:

$$\frac{210 + \underline{211} + \underline{212} + 220 + \underline{413}}{[110 + 120 + 210 + \underline{211} + \underline{212} + 220 + \underline{413}] + P * [\text{Eligible lost}]}$$

Where:

P (Proportion) = (COIN + ACBS TERE) / (COIN + ACBS TERE + ACBS Ineligible)

P = [(110+120) + (210+211+212+220)] / [(110+120) + (210+211+212+220) + (405+410+411+470)]

Eligible lost =

340, 355, 370, 420, 430, 435, 440, 450,
560, 565, 570, 575, 580, 585, 599

NOTES

- * Florida did not include children
- * Maine only included respondents inversion 3 of the sample split
- * Massachusetts only included respondents in version 1 of the sample split.
- * Nevada did not include children.
- * New Hampshire did not include children.
- * New York only included respondents in version 1 of the sample split.
- * North Carolina only included respondents in version 1 of the sample split and did not include children.

¹ Includes child without parent/guardian

NOTES

* Child data for Alabama, Arizona, DC, Hawaii, Illinois, Iowa, Louisiana, Maine, Massachusetts, Mississippi, Missouri, Montana, New York, North Dakota, Oklahoma, Oregon, Rhode Island, Vermont, West Virginia, and Wisconsin are not included in the file because there were too few records (<75) to produce reliable weights.

** Maine only included respondents in version 3 of the sample split

** Massachusetts only included respondents in version 1 of the sample split.

** New York only included respondents in version 1 of the sample split.

* Child data for Alabama, Arizona, DC, Hawaii, Illinois, Iowa, Louisiana, Maine, Massachusetts, Mississippi, Missouri, Montana, New York, North Dakota, Oklahoma, Oregon, Rhode Island, Vermont, West Virginia, and Wisconsin are not included in the public release file because there were too few records (<75) to produce reliable weights

** Two child records in Indiana and one child record in Pennsylvania could not be weighted or included in the public use file because the child's age increased above age 18 years between the BRFSS interview and the ACBS interview.

Appendix B:

BRFSS Response Rate Formulae

BRFSS CASRO Response Rate Formula

Completes = Completed or Partially Completed Interviews

$$\text{Completes} = (110+120+(210 \times .32))$$

Eligible=All respondents with known eligibility status categorized as eligible

$$\text{Eligible} = (110+120+210+220+230+240+250+260+270+280)$$

Ineligible= All respondents with known eligibility status categorized as ineligible

$$\text{Ineligible} = (405+410+420+430+435+440+450)$$

Unknown=All respondents with unknown eligibility status

$$\text{Unknown} = (305+310+315+320+325+330+332+335+340+345+350+355+360+365+370)$$

UNKNDNOM=Unknown respondents added to the denominator

$$\text{UNKNDNOM} = (\text{Eligible}/(\text{Eligible} + \text{Ineligible})) \times \text{Unknown}$$

$$\text{CASRO} = (\text{Completes} / (\text{Eligible} + \text{UNKNDNOM}))$$

BRFSS Overall Response Rate Formula

Completes = Completed or Partially Completed Interviews

$$\text{Completes} = (110+120+(210 \times .32))$$

Break-offs and Refusals = ((210x.68)+220)

Known Households = (230+240+250+260+270+280+305+310+315+335)

Ineligible Households = 410

All Likely Households= (345+350+320+325+330+332+340+370+355)

Households = (Known Households+Ineligible Households+Completes+Break-offs and Refusals+(.90xAll Likely Households))

Eligible Households = (.98xHouseholds)

Overall Response Rate = (Completes/Eligible Households)

BRFSS Cooperation Rate Formula

Completes = Completed or Partially Completed Interviews

$$\text{Completes} = (110+120+(210 \times .32))$$

Break-offs and Refusals = ((210x.68)+220)

Cooperation Rate = (Completes/(Completes+Break-offs and Refusals+250+260))

Appendix C:

Instructions for Assigning Additional ACBS Disposition Codes

Following are descriptions of the ACBS disposition codes adapted from standard BRFSS disposition codes and the ACBS disposition codes added to the standard set of BRFSS disposition codes. For detailed definitions for the standard BRFSS disposition codes see the Data Quality Handbook for each survey year (http://www.cdc.gov/brfss/technical_infodata/surveydata.htm).

I. Eligible, contacted: complete interview

110 Complete

Definition: Respondent completes the ACBS interview through the last question.

120 Partial complete

Definition: Respondent completes the ACBS interview at least through Section 8 (medications).

II. Eligible, contacted: refusal

210 Terminated within the questionnaire during the ACBS interview

Definition: If the respondent is contacted for the ACBS and terminates after the interview begins (section 3) but before completing section 8, then record is considered incomplete and is assigned disposition code 210.

211 Refused to allow combining ACBS responses with BRFSS responses

Definition: Some states require that the respondent provide active approval to combine their responses from the initial BRFSS interview with their responses from the ACBS interview. This approval may be requested at either the initial BRFSS interview or at the beginning of the ACBS interview. If the respondent does not approve combining data from the two interviews, the record is assigned disposition code 211.

212 Refused to answer the "ever had asthma" question during the ACBS interview

Definition: The selected respondent is contacted for the ACBS interview but refuses to answer the initial asthma question. If the respondent answers "don't know" or "refused" to the ACBS question EVER-ASTH (2.1) "Have you ever been told by a doctor or other health professional that (you have/sample child has) asthma?", then the record is assigned code 212.

220 Refused to begin the ACBS interview after contacted

Definition: If the selected respondent is contacted for the ACBS interview but refuses to begin the interview, then the record is assigned code 220.

413 Refused to participate in the call-back during the BRFSS interview

Definition: During the BRFSS interview, respondents who indicate they have ever been told by a doctor that they have asthma are asked if they will participate in an additional survey at a later date. Some state Institutional Review Boards (IRBs) require that the content of the additional survey (asthma) be disclosed; other state IRBs require that the specific content not be disclosed. Some states have multiple call-back surveys in the field and do not specify the content of any of the call-back interviews. If a respondent refuses to participate in the call-back survey, that record is assigned disposition code 413.

III. Eligible, lost to follow-up because unable to contact or communicate with the BRFSS respondent

306 Selected ACBS respondent no longer living in the BRFSS household

Definition: The BRFSS respondent with asthma left the BRFSS household between the BRFSS interview and the ACBS interview. If the selected respondent (from the BRFSS) no longer lives in the BRFSS household but did live in the household during the BRFSS interview, then attempts should be made to obtain new contact information for the selected respondent, and the follow-up should be conducted using the new telephone number. If this is not possible or the household refuses to provide new contact information, then the record is assigned disposition code 306.

Refer to the Data Quality Handbook for each survey year for the definitions of all other codes in this category (http://www.cdc.gov/brfss/technical_infodata/surveydata.htm).

IV. Eligible, lost to follow-up for technical reasons

Refer to the Data Quality Handbook for each survey year for the definitions of all codes in this category (http://www.cdc.gov/brfss/technical_infodata/surveydata.htm).

V. Ineligible

291 No parent or legal guardian in the household (child ineligible)

Definition: This code applies only to the child ACBS interview. The child selected during the BRFSS interview is eligible for the ACBS (the BRFSS respondent indicated that the selected child has an asthma diagnosis). However, ACBS child protocol requires that the BRFSS respondent must be the parent or guardian of the child to provide proxy responses for the child or to approve transfer to a more knowledgeable proxy respondent. If the BRFSS respondent is not the parent or guardian of the selected child with asthma, the child is ineligible for the ACBS. The child record is assigned disposition code 291.

405 Out-of-state

Definition: The BRFSS question that determines eligibility for the ACBS is “Have you ever been told by a doctor, nurse, or other health professional that (you have/the sample child has) asthma?” Respondents who answer “yes” are eligible for the ACBS. If the respondent is a state resident at the time of the BRFSS interview, but moves to an out-of-state residence between the BRFSS interview and the ACBS interview, then the respondent is no longer eligible for the ACBS, and the record is assigned disposition code 405.

410 Household, no eligible respondent (respondent does not have asthma)

Definition: The BRFSS question that determines eligibility for the ACBS is “Have you ever been told by a doctor, nurse, or other health professional that (you have/the sample child has) asthma?” Respondents who answer “yes” are eligible for the ACBS. If the respondent informs the ACBS interviewer that the recorded response from the BRFSS interview was in error and terminates the call, then the respondent is not eligible for the ACBS, and the record is assigned disposition code 410.

411 Selected respondent not eligible for follow-up

Definition: If the respondent disagrees with the recorded response to the asthma question from the BRFSS interview and answers “no” to the ACBS question EVER-ASTH (2.1) “Have you ever been told by a doctor or other health professional that (you have/the sample child has) asthma?”, then the respondent is not eligible for the ACBS, and the record is assigned disposition code 411.

412 Transferred from BRFSS but not attempted (excluded by state)

Definition: The BRFSS question that determines eligibility for the ACBS is “Have you ever been told by a doctor, nurse, or other health professional that (you have/the sample child has) asthma?” Respondents who answer “yes” are eligible for the ACBS. Eligible respondents are then asked for permission to call back. Those that agree should be called for the

ACBS interview. However, if a respondent eligible to be called is transferred from BRFSS to the ACBS but never called, then the record is assigned disposition code 412.

470 Misdiagnosed asthma in respondent (2008 and later)

Definition: The BRFSS question that determines eligibility for the ACBS is “Have you ever been told by a doctor, nurse, or other health professional that (you have/the sample child has) asthma?” Respondents who answer “yes” are eligible for the ACBS. However, the initial diagnosis could have been in error and changed. This misdiagnosis is not captured by the BRFSS or ACBS. If the respondent informs the interviewer of the misdiagnosis, the respondent is not eligible for the ACBS, and the record is assigned disposition code 470.

480 Not recruited for call-back at BRFSS interview (excluded by state)

Definition: The BRFSS question that determines eligibility for the ACBS is “Have you ever been told by a doctor, nurse, or other health professional that (you have/the sample child has) asthma?” Respondents who answer “yes” are eligible for the ACBS. Eligible respondents are then asked for permission to call back. Those who agree should be called for the ACBS interview. However, if a respondent eligible to be called is not transferred from BRFSS to the ACBS and is never called, then the record is assigned disposition code 480.

490 Random child/adult selection: adult ineligible, child selected

Definition: If both the BRFSS respondent and the randomly selected child in the household have asthma and the BRFSS respondent agrees to the call-back interview, one or the other is randomly selected to be eligible for the call-back. If the child is selected, the adult is ineligible, and the adult record is assigned disposition code 490.

491 Random child/adult selection: child ineligible, adult selected

Definition: If both the BRFSS respondent and the randomly selected child in the household have asthma and the BRFSS respondent agrees to the call-back interview, one or the other is randomly selected to be eligible for the call-back. If the adult is selected, the child is ineligible, and the child record is assigned disposition code 491.
