Comments

By having a bottle stand alone certification it would help the FD's in this time of tight money. As long as the bottle can pass all the certification requirements (DOT, NFPA, ANSI etc.) why not? It is an after market bottle, just like after market Harley parts. When you change the oil in your Dodge do you put a Mopar oil filter or a Fram filter? They both do the job but the Fram cost less. It would promote competition also. It is a little strange that SCI used to supply bottles to Scott, so they were approved at one time.
