Comments

The current standard needs to change in order to allow us, the end users save a ton of money. The basic fact that two main manufacturers make all the SCBA cylinders that we currently purchase already, should mean that we can directly purchase those same cylinders from them. If we can save 40% by going directly to the manufacturer of the cylinder versus the manufacturer of the SCBA, why wouldn't we want to do this? In this economic time, we need to be able to save every penny we can.
