

STD Project Area Point of Contacts (POC) with Data Sharing Protocols for using Interstate Communication Control Records

December 2024

Background

For several decades, the Interstate Communication Control Record (ICCR) has been used as a resource for STD programs to systematically maintain confidentiality while sharing client information between domestic jurisdictions to conduct public health prevention activities. ICCR facilitates data sharing to ensure at-risk or infected individuals are offered STD prevention services outside of the initiating jurisdiction. This includes the confidential follow-up of exposed sex partners, infected persons who need treatment or other services, and others in need of STD prevention services. This ICCR document consists of a roster of STD prevention program points of contact (POCs) in the United States, Puerto Rico and the US Virgin Islands, as well as directly-funded cities. These POCs have been authorized by their STD program directors to accept and share confidential public health information from one jurisdiction to another so that individuals in need of prevention services may be reached promptly, professionally, and confidentially.

The Council of State and Territorial Epidemiologists (CSTE) approved a position statement in 2003 (03-ID-10) clarifying processes to be used by health departments in determining residence for disease reporting purposes. The position statement also specifies which jurisdiction should take responsibility for reporting cases to CDC through the National Notifiable Diseases Surveillance System (NNDSS) when they are determined to live out of jurisdiction at the onset of illness. Rules guiding decisions for persons on vacation, homeless persons, people with multiple residences, students, military personnel, persons in jails/institutions and foreign nationals are described. Also included in this position statement are rules clarifying appropriate values for the 'IMPORTED' variable in the core National Electronic Telecommunications System for Surveillance (NETSS) record. This document is a useful reference for most of the situations commonly encountered in STD surveillance. The CSTE position statement can be assessed here: [Council of State and Territorial Epidemiologists Position Statement](#)

Confidentiality

Health Departments should consult and follow the recommendations in the Data Security and Confidentiality Guidelines

(See: [Data Security and Confidentiality Guidelines](#)) to ensure confidentiality is protected and maintained across jurisdictions. Communications between public health jurisdictions, including the protection of confidential information, is the responsibility of each project area. Information sharing between jurisdictions should be limited to the ICCR Coordinators to ensure confidentiality is maintained. Moreover, the Data Security and Confidentiality Guidelines recommend that written data sharing plans serve as a starting point for discussion about data sharing between public health programs. Having a plan in writing can also formalize procedures and help resolve any conflicts. (See page 7 of the Data Security and Confidentiality Guidelines). CDC is not directly involved in the sharing of confidential data through ICCR. Health departments should work collaborative to protect confidentiality across jurisdictions.

Health Departments considering the use of facsimile machines to share information should refer to Appendix F of the Data Security and Confidentiality Guidelines, “Guidelines for the Use of Facsimile Machines”, to identify ways to protect confidentiality when using fax machines. For your convenience, the ‘Guidelines for the Use of Facsimile Machines’ are also provided on page 74 of this document.

Health Departments considering using mail to transmit their confidential information should develop and follow a written policy on mailing confidential materials for their jurisdiction (for more information see Standard 4.3 on p. 26 in the Data Security and Confidentiality Guidelines). Regardless of the mechanism, confidential public health information should be shared securely and promptly to ensure public health follow-up is timely and confidential wherever it occurs.

How to use this Document

ICCR should be used to identify and confidentially contact POCs in other jurisdictions to inform them about individuals in their jurisdiction in need of STD prevention services. Examples of when ICCR may be used to conduct out of jurisdiction (OOJ) activities include individuals living in another state who either have tested positive for an STD or have been named as a sex partner of an infected person. When cross-jurisdictional public health follow-up is needed, staff should gather all pertinent locating, medical, and risk information of the individual in need of services and share it confidentially with their jurisdiction's ICCR POC. The initiating ICCR POC will then contact the ICCR POC in the receiving jurisdiction; using ICCR to identify the receiving POC, the acceptable mechanism for information sharing, and type of investigations that are accepted. In addition to POCs, ICCR lists the type of follow-up each jurisdiction accepts and the desired method of communication. Through these established points of contact, jurisdictions may share data efficiently and confidentially. The following are common scenarios for sharing STD prevention data. **Examples are for illustrative purposes only. Final dispositions should be shared with the initiating project area whenever practical.**

Positive Syphilis Laboratory Test

A positive laboratory test, absent any treatment or diagnostic information, should be forwarded from the project area where the test was performed to the patient's resident project area. Patient contact should follow the receiving project area's standard protocols and procedures. Any resultant morbidity lies with the resident project area.

Example: John Doe is seen by a health care provider in Worcester Massachusetts and lives in Hartford Connecticut. A positive RPR and FTA are reported to the Massachusetts STD prevention program. No treatment or history exists in Massachusetts. The Massachusetts STD program should forward the positive serology results to the Connecticut STD prevention program for follow-up as per Connecticut's standard protocols. If a new case of syphilis, morbidity belongs to Connecticut.

Positive Chlamydia and/or Gonorrhea Laboratory Test

A positive laboratory test, with or without treatment or diagnostic information, should be forwarded from the project area where the test was performed to the patient's resident project area. Patient contact should follow the receiving project area's standard protocols and procedures. Morbidity lies with the resident project area.

Example: Jane Doe is seen by a health care provider in Milwaukee Wisconsin, and lives in Chicago Illinois. A positive GC NAAT is reported to the Wisconsin STD Prevention program. Treatment is verified. The Wisconsin STD prevention program should forward the positive GC NAAT result and treatment information to the Chicago STD prevention program for follow-up as per Chicago's standard protocols. Morbidity belongs to Chicago. Data sharing process remains the same if treatment was not provided; information should be forwarded to the Chicago STD prevention program for follow-up as per their protocols. Morbidity still belongs to Chicago.

Diagnosed Case of Syphilis

A confirmed case of syphilis (positive laboratory plus verified treatment and diagnosis) should be forwarded from the project area where the case was diagnosed and treated to the patient's resident project area. Initiating project area should note the need (or not) for interview and partner services. Patient contact should follow the receiving project area's standard protocols and procedures. Any resultant morbidity lies with the resident project area.

Example: John Smith is diagnosed with secondary syphilis and appropriately treated in Washington DC and lives in Potomac Maryland. The DC STD prevention program should

forward all necessary case information to the Maryland STD prevention program for follow-up as per Maryland's standard protocols. Morbidity lies with Maryland.

Partner Services

Partner information should be forwarded from the project area where the information was gathered to the partner's resident project area. Follow-up will proceed according to the receiving project area's standard protocols as reflected in this document (some project areas will NOT accept partners to CT or GC).

Example: Jane Smith is named as a contact to an early-latent case of syphilis in New Orleans Louisiana. Jane lives in Dallas Texas. The Louisiana STD prevention program should forward all necessary information to provide partner notification services to Jane to the Texas STD prevention program.

There is no need to forward any ICCR requests, domestic or international, to DSTDP. Data sharing should occur directly between STD-PCHD project areas.

The following pages list the STD ICCR points of contact in each of the STD-PCHD-awarded project areas (fifty states, seven directly-funded cities, and two territories), as well as all provinces in Canada. HIV ICCR points of contact are included to facilitate data sharing for the purposes of HIV prevention activities.

Updates to STD ICCR points of contact can be sent to std_pchd@cdc.gov.

ALABAMA

Alabama Department of Public Health-STD Division
201 Monroe St.
Montgomery, AL 36104

Hours of Operation: 8:30 am – 5:00 pm Central

Note: OOI information must provide minimum patient location information e.g. name or telephone number or address or all of the above.

Point of Contact: Supervisor Beverly Frank

Main Number: 334-206-5350

Syphilis

Point of Contact: Brenda Cole

Phone: 334 206-7032 (confidential voice)

Fax: 334-206-2768

Email: Brenda.Cole@adph.state.al.us

Point of Contact: Beverly Thomas

Phone: 334 206-2772 (confidential voice)

Fax: 334-206-2768

Email: beverly.thomas@adph.state.al.us

Point of Contact: Jennifer Collins

Phone: 334 206-2771 (confidential voice)

Fax: 334-206-2768

Email: beverly.collins@adph.state.al.us

Point of Contact: Thomas Lee

Phone: 334 206-7965 (confidential voice)

Email: thomas.lee@adph.state.al.us

Point of Contact: Anthony Merriweather

Phone: 334 206-2765 (confidential voice)

Fax: 334-206-2768

Email: anthony.merriweather@adph.state.al.us

Point of Contact: Tonya Snider

Phone: 334 206-5914 (confidential voice)

Email: tonya.snider@adph.state.al.us

Syphilis stages/reactors accepted and followed: All syphilis stages.

Method(s) of transmitting confidential patient data: Securely call, fax, or mail to POC.

Return of disposition/time frame: Yes; two weeks

HIV

Point of Contact: Brenda Cole or Beverly Thomas or Jennifer Collins or Thomas Lee or Anthony Merriweather or Tonya Snider (Contact information is same as above.)

HIV cases/contacts followed: All HIV cases/contacts.

Method(s) of transmitting confidential patient data: Securely call, fax, or mail to POC.

Return of disposition/time frame: Yes; one month

Gonorrhea (GC)

Point of Contact: Brenda Cole or Beverly Thomas or Jennifer Collins or Thomas Lee or Anthony Merriweather (Contact information is same as above.)

GC cases/contacts accepted and followed: All GC cases/ contacts.

Method(s) of transmitting confidential patient data: Securely call, fax, or mail to POC.

Return of disposition/time frame: Yes; two weeks.

Chlamydia (CT)

Point of Contact: Brenda Cole or Beverly Thomas or Jennifer Collins or Thomas Lee or Anthony Merriweather (Contact information is same as above.)

Method(s) of transmitting confidential patient data:

Securely mail all correspondence to:
201 Monroe St., Montgomery, AL 36104.

Return of disposition/time frame: Yes, two weeks.

ALASKA

State of Alaska Department of Health

Division of Public Health – HIV/STD Program

3601 C Street, Suite 540

Anchorage, AK 99503

Hours of Operation: 9:00am and 4:30pm (Alaska Time Zone)

(Alaska Time Zone is 4 hours behind Eastern Time)

Syphilis

Point of Contact: Claire Stump

Email: Jennifer.stump@alaska.gov (do not email confidential information)

Phone: 907-444-0990 (confidential line)

Fax: 907-561-4239 (confidential line)

Alternate Point of Contact: Savannah Bayer

Email: savannah.bayer@alaska.gov (do not email confidential information)

Confidential line: 907-717-0076

Confidential fax: 907-561-4239

Alternate Point of Contact: Hesper Clemons

Email: hesper.clemons@alaska.gov (do not email confidential information)

Confidential line: 907-891-4807

Confidential fax: 907-561-4239

DIS Team Contacts: Mahelet Amare, Sarah Brewster, Tamara Davis, Roseann Figueroa, Hannah Guzzi, Keelan Kenny, TJ Hernandez, Julien Hill, Kristin Johnson, Shayna Matson, and Kayla Munday. DIS Team members may contact out of state ICCR POCs to clarify syphilis record search results.

Syphilis stages/reactors accepted and followed: All cases and all named partners, sexual network contacts, and associates accepted. Primary, secondary, and early latent will be initiated for follow-up. Additional public health follow-up will be determined by our current reactor grid guidelines. Named contacts should include patient locating information (name, age or DOB, and address and/or phone number) AND exposure dates.

Method(s) of transmitting confidential patient data: Securely call or fax POC.

*Please include originating agency name and point of contact information on all transmissions.

Return of disposition/time frame: All dispositions will be returned upon closure.

HIV

Point of Contact: Sarah Brewster

Email: sarah.brewster@alaska.gov (do not email confidential information)

Phone: 907-269-8057 (confidential line)

Fax: 907-561-4239 (confidential line)

Secondary Point of Contact: Claire Stump

Email: Jennifer.stump@alaska.gov (do not email confidential information)

Phone: 907-444-0990 (confidential line)

Fax: 907-561-4239 (confidential line)

HIV cases/contacts followed: All named partners, sexual network contacts and associates; all newly identified infections; prior infections with a current STD or when named as an unsafe partner.

Method(s) of transmitting confidential patient data: Securely call or fax POC.

*Please include originating agency name and point of contact information on all transmissions.

Return of disposition/time frame: All dispositions will be returned upon closure.

Gonorrhea (GC) / Chlamydia (CT)

Point of Contact: Hesper Clemons

Email: hesper.clemons@alaska.gov (do not email confidential information)

Phone: 907-891-4807 (confidential line)

Fax: 907-561-4239 (confidential line)

Point of Contact: Savannah Bayer

Email: savannah.bayer@alaska.gov (do not email confidential information)

Confidential line: 907-717-0076

Confidential fax: 907-561-4239

CT/GC cases/contacts accepted and followed: All positive CT and GC test reports are accepted for morbidity. Untreated pregnant patients and patients with treatment resistant GC or DGI are assigned for follow-up.

Method(s) of transmitting confidential patient data: Securely call or fax POC.

*Please include originating agency name and point of contact information on all transmissions.

ARIZONA

The following information is intended for jurisdictions outside of Arizona. This section identifies the 4 reportable STD's, the point of contact, and information required from the jurisdiction for follow-up from Arizona county health departments. In the absence of the ICCR Coordinator, an alternative contact person will assume this role. All Arizona health departments and out of jurisdiction entities will be notified of the temporary contact information in advance.

Arizona Department of Health Services
Sexually Transmitted Disease Control Program
150 N. 18th Ave, Ste 280
Phoenix, AZ 85007-3237
Phone: 480-433-4803 (confidential)
Fax: 602-542-0150 (confidential)

Syphilis

Point of Contact: Letty Medina
Email: letty.medina@azdhs.gov
Phone: 480-433-4803 (confidential)
Fax: 602-542-0150 (confidential)

Accepted and followed:

Syphilis reactors and contacts to Syphilis cases (with the exception of (745) Late, Latent Syphilis).

MUST include demographic information (complete name or alias, DOB or age, city/state or county/state).

Documentation of previous attempts of locating and outcome; phone calls, e-mails, texts, place of employment, etc.

Exposure dates and pregnancy status of contacts.

Methods of transmitting confidential patient data:

Call or fax attention to POC

Return of disposition and time frame:

By request

4 Weeks

Congenital Cases (ONLY)

Point of Contact: Bree Anderson
Email: Breanne.anderson@azdhs.gov
Phone: 602-542-9367 (confidential)
Fax: 602-542-0150 (confidential)

Methods of transmitting confidential patient data:

Call or fax, attention to POC

Return of disposition and time frame:

By request

Gonorrhea

Point of Contact: Letty Medina
Email: letty.medina@azdhs.gov
Phone: 480-433-4803 (confidential)
Fax: 602-542-0150 (confidential)

Accepted and followed:

Only accept with Syphilis (with the exception of (745) Late, Latent Syphilis).

Methods of transmitting confidential patient data:

Call or fax attention to POC

Return of disposition time frame:

By request

2 Weeks

Chlamydia

Point of Contact: Letty Medina

Email: letty.medina@azdhs.gov

Phone: 480-433-4803 (confidential)

Fax: 602-542-0150 (confidential)

Accepted and followed:

Only accept with Syphilis (with the exception of (745) Late, Latent Syphilis).

Methods of transmitting confidential patient data:

Call or fax attention to POC

Disposition will not be returned.

HIV

The ADHS HIV Surveillance Program processes all HIV cases/contacts and HIV co-morbid cases/contacts. Please follow up with ADHS HIV Surveillance Point of Contact below

Point of Contact: Gabriela Ramirez

Email: gabriela.ramirez@azdhs.gov

Phone: 602-526-2386 (confidential)

Fax: 602-542-1120 (confidential)

HIV cases/contacts accepted and followed:

All newly identified HIV and co-morbid infections and contacts to HIV cases

Must include demographic information (complete name or alias, age/DOB, and race/ethnicity) and at least two forms of locating information including; specific and complete description of the contact/case, address, phone number or directions for locating contact/case.

Documentation of previous attempts of locating and outcome; phone calls, e-mails, texts, place of employment, etc.

Methods of transmitting confidential patient data:

Call or fax attention to ADHS HIV Surveillance POC

Return of disposition time frame:

2 weeks

ARKANSAS

Arkansas Department of Health
STI/HIV/Hepatitis C/Tuberculosis Section
4815 West Markham Street, Mail slot # 33
Little Rock, AR 72205-3867

Hours of Operation: 8:00 a.m. – 4:30 p.m. Monday – Friday CST (except holidays).

Syphilis

Point of Contact: Marie Wilson
Email: Eleanor.Wilson@arkansas.gov
Phone: 501-280-4036
Fax: 501-661-2035

Syphilis stages/reactors accepted and followed: Partners, associates and sexual network contacts, all syphilis reactors under 45; all pregnant patients.

Method(s) of transmitting confidential patient data: Call, fax or mail POC.

Return of disposition/time frame: Yes, twenty days (allowed ten working days).

HIV

Point of Contact: Keeven Murphy
Email: Keeven.Murphy@arkansas.gov
Phone: 501-661-2887
Fax: 501-280-4120

HIV cases/cases followed: All

Method(s) of transmitting confidential patient data: Call, fax or mail POC.

Return of disposition/time frame: Yes, twenty days (ten working days).

Gonorrhea (GC)

Point of Contact: Austin Teichelman
Email: Austin.teichelman@arkansas.gov
Phone: 501-661-2466
Fax: 501-661-2035

GC cases/contacts accepted and followed: All

Method(s) of transmitting confidential patient data: fax or mail POC.

Return of disposition/time frame: Yes, twenty days (ten working days).

Chlamydia (CT)

Point of Contact: Jingyun Wu
Email: Jingyun.Wu@arkansas.gov
Phone: 501- 683-1373
Fax: 501-661-2035

CT cases/contacts accepted and followed: All

Method(s) of transmitting confidential patient data: Call, fax or securely mail POC

Return of disposition/time frame: Yes, twenty days (ten working days)

BALTIMORE CITY

STD/HIV Prevention Program
1001 East Fayette Street
Baltimore MD 21202

Hours of Operation: 9:00 am to 4:30 pm.

Syphilis

Point of Contact: Rhonda Overton, Administrative Assistance Title 3

Email: Rhonda.Overton@baltimorecity.gov

Phone: 410-396-4448

Fax: 410-625-0688

Syphilis stages/reactors accepted and followed: We accept all syphilis reactors and partners to syphilis cases. Please provide as much locating information as possible.

Method(s) of transmitting confidential patient data: Call or fax POINT OF CONTACT

Return of disposition/time frame: Yes, return disposition in two weeks. Please call POINT OF CONTACT to check on disposition if you do not receive a return call.

HIV

Point of Contact: Rhonda Overton, Administrative Assistance Title 3
(Contact information is same as above)

Point of Contact: Nathalie Wilson, HIV reactor desk coordinator

Email: Nathalie.wilson@baltimorecity.gov

Phone: 410-396-4448

HIV cases/contacts followed: We accept all HIV reactors and partners to HIV cases. Please provide as much locating information as possible.

Method(s) of transmitting confidential patient data: Call or fax POINT OF CONTACT.

Return of disposition/time frame: 30 days

Gonorrhea (GC)

Point of Contact: Rhonda Overton, Administrative Assistance Title 3
(Contact information is same as above)

GC cases/contacts accepted and followed: We do not accept contacts for follow-up.

Method(s) of transmitting confidential patient data: Call or fax POINT OF CONTACT.

Return of disposition/time frame: Yes, return disposition in two weeks. Please call POINT OF CONTACT to check on disposition if you do not receive a return call.

Chlamydia (CT)

Point of Contact: Rhonda Overton, Administrative Assistance Title 3
(Contact information same as above)

CT cases/contacts accepted and followed: We do not accept contacts for follow-up.

Method(s) of transmitting confidential patient data: Call or fax POINT OF CONTACT.

Return of disposition/time frame: Yes, return disposition in two weeks. Please call POINT OF CONTACT to check on disposition if you do not receive a return call.

CALIFORNIA

(Not including Los Angeles or San Francisco; these areas are listed below)

California Department of Public Health

STD Control Branch, MS 7320

1616 Capitol Avenue, Suite 74.660

P.O. Box 9973 77

Sacramento, CA 95899-7377

Hours of Operation: 7:30am – 3:30pm PST

Surveillance Supervisor: Robbie Snyder

Phone: 279-203-5565

Syphilis

Point of Contact: Kirsten Taylor-Dutt (Same address as listed above)

Phone: 916-552-9811 (with confidential voice mail)

Fax: 916-636-6212

Email: stdsurv@cdph.ca.gov

Syphilis stages/reactors accepted and followed: We accept all syphilis reactors and partners to syphilis cases. Please provide as much locating information as possible. Please indicate congenital syphilis, as well as treatment status of pregnant persons with syphilis where possible.

Method(s) of transmitting confidential patient data: Confidential/secure email (preferred), call, or fax POC.

Return of disposition/time frame: Yes, two weeks-one month (depending on local HD).

Partners to HIV

Point of Contact: Kirsten Taylor-Dutt (Same contact information as listed above)

Method(s) of transmitting confidential patient data: Call or fax POC.

Return of disposition/time frame: Yes, two weeks- one month (depending upon local HD).

Gonorrhea (GC)

Point of Contact: Kirsten Taylor-Dutt (Same contact information as listed above)

GC cases/contacts accepted and followed: Only accepts and follows up on patients who are infected with GC and need treatment. GC contacts may not be followed by all local health jurisdictions.

Method(s) of transmitting confidential patient data: Confidential/secure email (preferred), call, or fax POC.

Return of disposition/time frame: Yes, Two weeks-one month (depending upon local health jurisdiction).

Chlamydia (CT)

Point of Contact: Kirsten Taylor-Dutt (Same contact information as listed above)

CT cases/contacts accepted and followed: Only accepts and follows up on patients who are infected with CT and need treatment. CT contacts may not be followed by all local health jurisdictions.

Method(s) of transmitting confidential patient data: Confidential/secure email (preferred), call, or fax POC.

Return of disposition/time frame: No

CHICAGO

Chicago Department of Public Health
STI/HIV Division, STI Surveillance Unit
1340 South Damen 4th floor
Chicago, IL 60608

Hours of Operation: 8:00 a.m. – 4:00 p.m.

Program Director, Tammy Rutledge, MHA, ASQ CQA

For Record Search Requests Contact: Cindy Loftin

Email: cindy.loftin@state.co.us

Google Voice: 720-282-1378

Fax: 303-782-5393

Syphilis stages/reactors accepted and followed: P&S, EL/ All reactors and 59 y/o and under Cases and Contacts (excluding suspects and associates). Please include exposure dates.

Method(s) of transmitting confidential patient data: Phone, confidential email, and Efax

Return of disposition/time frame: Yes, upon request.

HIV

Point of Contact: Cindy Loftin

HIV cases/contacts followed: All newly diagnosed or contacts to those without viral suppression. Cases and Contacts. Please include exposure dates.

Method(s) of transmitting confidential patient data: Phone, confidential email, and Efax.

Return of disposition/time frame: Upon request

Gonorrhea (GC)

Point of Contact: Arely Tarin-Gonzalez

Email: arely.tarin-Gonzalez@state.co.us

Google Voice: 720-263-0562

Efax: 303-782-5393

Resistant GC cases/contacts accepted and followed only. Please include exposure dates.

Method(s) of transmitting confidential patient data: Phone, confidential email, and Efax.

Return of disposition/time frame: No

Chlamydia (CT)

Point of Contact: Arely Tarin-Gonzalez

Email: arely.tarin-Gonzalez@state.co.us

Google Voice: 720-263-0562

Efax: 303-782-5393

CT cases/contacts accepted and followed: None at this time.

Method(s) of transmitting confidential patient data: Phone or fax POC

Return of disposition/time frame: No

Back Up Contact: Adrianna Hervey, Program Manager, Surveillance & Case Ascertainment Program

Email: Adrianna.hervey@state.co.us

Phone: 303-692-2694 **Voice:** 720-263-0415

CONNECTICUT

Connecticut Department of Health
STD Control Program
410 Capitol Avenue, MS#11STD
Hartford, CT 06134-0308
Main phone: 860-509-7920
Hours of Operation: 9:00am – 4:00pm

Point of Contact: Virgen Roman
Alternate Contacts: Angela Cumberbatch; Ava Nepaul

Syphilis

Point of Contact (Interim): Virgen Roman
Email: virgen.roman@ct.gov (Please do not send any confidential email or PHI via email)
Phone: 860-214-7060 (confidential)
Fax: 860-730-8380 (secure RightFax)

Syphilis stages accepted and followed: All primary, secondary, and early non-primary, non-secondary; partners to 710/720/730; and congenital syphilis.

In addition to case/partner name, please include at least two of the following: date of birth/age; address; phone number(s); email address.

If available, information on pregnancy status, treatment status, and concise information on DIS outreach attempts.

Exposure dates and pregnancy status of cases and partners.

Method(s) of transmitting confidential patient data: Fax POC preferred.

Return of disposition/time frame: 2-4 weeks

HIV

Point of Contact: Virgen Roman (Same contact information as listed above)

HIV cases/contacts followed: All cases and contacts are followed.

Method(s) of transmitting confidential patient data: Fax POC preferred

Return of disposition/time frame: Four weeks

Mpox

Point of Contact: Virgen Roman (Same contact information as listed above)

Mpox cases/contacts followed: Persons will be contacted by local health department (LHD) staff. Address information required for LHD follow-up.

Method(s) of transmitting confidential patient data: Fax POC.

Return of disposition/time frame: TBD

Gonorrhea (GC)

Point of Contact: Virgen Roman (Same contact information as listed above)

GC cases/contacts followed: Only morbidity reports are accepted until further notice.

Method(s) of transmitting confidential patient data: Fax POC.

Chlamydia (CT)

Point of Contact: Virgen Roman (Same contact information as listed above)

CT cases/contacts followed: Only morbidity reports are accepted until further notice.

Method(s) of transmitting confidential patient data: Fax POC.

DELAWARE

Phone: 609-433-2360 FX: 609-826-4870

Email: steven.dunagan@doh.nj.gov

Syphilis stages/reactors accepted: We accept all reactors. We follow reactors up to 49 yrs., with or w/o an RPR and our grid will determine follow-up on reactors with titers.

We follow partners to: primary, secondary, and early latent syphilis cases. We need descriptions, exposure dates, age, address with city and at least a working phone # if not a complete address.

Method(s) of transmitting confidential patient data: Reactors and partners can be faxed.

Return of disposition/time frame: Two weeks

HIV

Point of Contact: Deborah Gleissner

Email: Deborah.gleissner@doh.nj.gov

Phone: 609-273-6575

HIV cases/contacts followed: New infections, prior infections with current STD...call for more information if needed.

Method(s) of transmitting confidential patient data: Call POC.

Return of disposition/time frame: Thirty days

Second Point of Contact: Sandra Snipes (Same as contact information as listed above).

Gonorrhea (GC)

Point of Contact: Sandra Snipes (Same contact information as listed above).

GC cases/contacts accepted: All positive test reports for morbidity. We follow all pregnant females and cases under 14 yrs. We also follow pregnant contacts and any contact to designated resistant GC cases.

Method(s) of transmitting confidential patient data: Same contact information as listed above.

Return of disposition/time frame: Two weeks

Chlamydia (CT)

Point of Contact: Sandra Snipes (Same contact information as listed above).

CT cases accepted: All positive test reports for morbidity. We follow cases under 14 yrs. and all pregnant females.

Method(s) of transmitting confidential patient data: Same contact information as listed above.

Return of disposition/time frame: Two weeks

NEW MEXICO

Public Health Division
Infectious Disease Bureau
STD Prevention Program
1190 St. Francis Dr. Suite S-11200
Santa Fe, NM 87505

Syphilis

Point of Contact: Lewis Smith
Phone: 505-476-3636
Fax: 505-476-3638
Email: LDS5@cdc.gov

Point of Contact: LeAnn Allison
Phone: 505.629.7009
Fax: 505.476.3638
Email: Leann.allison@doh.nm.gov

Use the STD Program mailing address above for Lewis Smith or LeAnn Allison.

Syphilis stages/reactors accepted and followed: All Reactors for morbidity purposes. (Once a case is determined to be a late case, partner notification will not occur). Moreover, all cases that meet our reactor grid requirements are followed to include cases related contacts, suspects, and associates except for contacts to late syphilis.

Method(s) of transmitting confidential patient data: Preferred by fax; we also accept reports by phone or mail.

Return of disposition/time frame: One month.

HIV (All case related contacts, suspects, and associates)

Point of Contact: Same POCs as syphilis for all case related contacts, social contacts, and associates. See the contacts below for HIV positive test results.

HIV cases/contacts followed: Case related contacts, suspects, and associates.

Method(s) of transmitting confidential patient data: Same as for syphilis.

Return of disposition/time frame: One month.

HIV (New Mexico residents with positive HIV test results)

Point of Contact: Jeff Lauritsen, HIV Surveillance Coordinator

Email: jeff.lauritsen@state.nm.us

Phone: 505-476-3509

Fax: 505-476-3544

HIV cases/contacts followed: All New Mexico HIV cases are accepted and followed. Persons residing outside New Mexico who have contacts that reside in New Mexico should be referred to the Syphilis contact (see above).

Method(s) of transmitting confidential patient data: Call, Fax, or Mail.

Return of disposition/time frame: Not applicable

Gonorrhea (GC)

Point of Contact: Same as syphilis.

GC cases/contacts accepted and followed: Priority only

Method(s) of transmitting confidential patient data: Same as for syphilis.

Return of disposition/time frame: Two weeks.

Chlamydia (CT)

Point of Contact: Same as for syphilis.

CT cases/contacts accepted and followed: Priority only

Method(s) of transmitting confidential patient data: Same as for syphilis.

Return of disposition/time frame: Two weeks.
