

# Preventing Suicide

## CDC's Injury Center Uses Data and Research to Save Lives

In 2022

Suicide was responsible for more than

# 49,000 lives lost

That's 134 suicides per day

13.2M

adults **seriously thought** about suicide

3.8M

made a **plan**

1.6M

made an **attempt**

# #3

Suicide is the **3rd leading cause of death** among youth 10–24 years old

In 2020

Suicides and suicide attempts cost the United States more than

# \$500 billion

Suicide can have lasting harmful effects on **individuals, families, schools, workplaces, and communities**

### CDC's Vision

**No lives lost to suicide.** CDC uses data, research, and partnerships to identify and implement effective suicide prevention strategies to foster healthy and resilient communities across the U.S.

### Disparities

Risk for suicide and suicide attempts disproportionately affects some groups, including:

- **Veterans**
- **LGBTQ youth and adults**
- **People who live in rural areas**
- **Middle-aged adults (35–64 years)**
- **Tribal populations**
- **Youth (10–24 years)**

### CDC Supports Communities By

#### **Funding the Comprehensive Suicide Prevention Program**

to reduce suicide by 10% among disproportionately affected populations by 2025

#### **Using near real-time data to track and monitor suicide trends**

that inform public health suicide prevention efforts

#### **Funding tribes to increase their capacity**

to tailor, implement, and evaluate programs to prevent suicide among American Indian and Alaska Native people

Sharing the best available evidence for suicide prevention in CDC's **[Suicide Prevention Resource for Action](#)**

#### **Working with CDC Foundation to build the capacity of veteran-serving organizations**

to evaluate their upstream suicide prevention activities

**Developing and sharing community resources** to prevent suicide during public health emergencies
